Operational readiness.

- ✓ Broad portfolio, ranging from the legendary Unimog with a payload of at least 2 tonnes, to our heavy-duty Arocs tractor with a gross combined traction weight of 250 tonnes
- ✓ Made-to-measure solutions for any scenario
- ✓ From a trusted partner to armed forces worldwide
- ✓ Maximum mobility. At all times, in all places
- ✓ Mercedes-Benz Service and Integrated Logistics Support

TRUST IN MILLIONS OF MILES OF EXPERIENCE.

Mercedes-Benz Defence Trucks.

Our defence vehicles draw on our unique experience as the world's leading truck manufacturer. They are designed and built to succeed in diverse military scenarios in a wide variety of environments. Every day across the world, they demonstrate their reliability, durability and ruggedness under the most adverse operational and climatic conditions.

Mercedes-Benz Defence Trucks are designed to navigate roads and difficult off-road terrain with ease – providing you with the best solution for your transportation needs. Plus, take advantage of our unrivalled worldwide service network and global presence for outstanding advice and assistance – and maximum vehicle availability.

The star is the difference. It stands for trucks you can trust.

The world's leading truck manufacturer.

- ✓ Defence vehicles based on extensively tried-and-tested volume-production trucks
- ✓ Tailored and optimised to meet all military user requirements
- ✓ Guaranteed product and service quality – Made in Germany
- ✓ Advanced technologies with a focus on total cost of ownership, robustness and reliability
- ✓ Spare parts, maintenance and repairs available from 5,000 authorised workshops in over 160 countries

WHEN QUALITY IS VITAL, YOU CAN COUNT ON THE THREE-POINTED STAR.

A trusted partner to armed forces worldwide.

Wherever you are in the world, where roads end and the toughest terrain begins, Mercedes-Benz all-wheel drive trucks are your most reliable means of transportation. When the smallest details can mean reaching a destination safely, experience and quality are irreplaceable. The very best equipment offers you dependability even under the most extreme conditions.

The best proof of our ability to deliver on promises is the trust placed in us by militaries across the globe – for over 100 years, in more than 80 countries.

A ONE-STOP SOLUTION TO YOUR NEEDS.

Built to master any operational scenario.

As the largest commercial vehicle manufacturer in the world, Mercedes-Benz Defence Trucks offers a broad portfolio, ranging from the legendary Unimog with a payload of at least 2 tonnes, to our heavy-duty Arocs tractor with a gross combined traction weight of 250 tonnes.

Mercedes-Benz Defence Trucks can offer you a tailor-made solution to any operational need – with our Unimog, Zetros or Arocs families. Our proven, powerful and reliable trucks deliver a wide variety of capabilities.

We give you an effective answer to your challenges – be it for transport of personnel, materiel, heavy-duty tasks, dangerous goods, or humanitarian aid. And our vehicles give you reliability and performance in all conditions, including off-road and long haul scenarios. Defence vehicle capabilities start where paved roads end.

DEPLOYED FOR ALL KINDS OF TASKS.

The effectiveness and reliability of army transport vehicles is of crucial importance at all times, in all scenarios. That calls for a seamless supply of maintenance, repairs and operations (MRO) materials to safeguard the ongoing availability of assets and resources. In the military, uptime is everything.

Against this background, we have a worldwide and comprehensive service network to support our dependable, robust and cost-effective Mercedes-Benz Defence Trucks.

Our portfolio encompasses a wide range of emission classes, from Euro III to Euro VI. So you will find the right solution for your needs, in Europe or in other parts of the globe.

Always mission-ready. There are Mercedes-Benz trucks deployed for all kinds of tasks in all four corners of the world. The vehicle chassis are of exceptionally bodybuilder-friendly design.

Specifically, standardised mounting points allow our partners to install even the most complex of bodies and other superstructures. By employing adapted civilian mounting points, we can accelerate development and lower integration costs for military applications.

Custom solutions. Special tasks require exceptional solutions. Mercedes-Benz Defence truck engineers deliver tailor-made answers to your special needs, and corresponding equipment for our Special Chassis.

Learn more about the Mercedes-Benz Special Chassis on page 48.

Outstanding versatility. Power take-offs and standardised interfaces and mounting points for a wide variety of superstructures and attachments – from cranes to winches, and from hydraulic pumps to electrical connections – make Mercedes-Benz vehicles exceptionally versatile.

True partners. A spirit of partnership and close collaboration is an important element of the Mercedes-Benz Defence Trucks strategy. Our trucks can be easily customised in line with your unique imperatives – including for the rapid deployment of a wide range of NATO containers on the same vehicle.

Tailor-made solutions.

- ✓ From experts for custom solutions
- ✓ Based on commercial vehicles and suitable for almost any application
- ✓ With standardised hydraulic and electrical interfaces
- ✓ Able to withstand extreme climatic conditions
- ✓ For on and off-road deployment

MAXIMUM MOBILITY. AT ALL TIMES, IN ALL PLACES.

Setting the standard for off-road mobility.

Have the right equipment for your mission: vehicles that you can trust in completely. In freezing temperatures and scorching desert heat, on paved roads and rugged terrain. Versatile vehicles that are safe, and simple to operate and maintain. And that are reliable by design.

ALWAYS ON THE MOVE.

Fast and unstoppable – with a robust chassis and technology expertise that has been unrivalled for decades.

Mercedes-Benz Defence Trucks have been evolved and tailored for a variety of military scenarios. So you can count on maximum operational readiness, even under the most adverse conditions.

With tirecontrol or tirecontrol plus, you can adjust the tyre pressure to suit the terrain – with just the flick of a switch.

Maximum traction for off-roading. The tyre pressure can be raised or lowered using the tirecontrol or tirecontrol plus central tyre inflation system (CTIS) – separately, for front and rear axles, and to accommodate the current load and operating conditions. The result is high traction on any surface.

Powerful propulsion – from Euro III to Euro VI. Remaining mobile means adapting to the local fuel situation. That's why our powertrain options range from advanced, eco-friendly Mercedes-Benz BlueEfficiency Euro VI engines, to engines compliant with other, regional emission standards.

In addition, we offer vehicles that can master both fuel extremes: from military fuels that deviate from diesel standards, i.e. with high levels of sulphur or other impurities, to fuels compliant with Euro VI.

Example display for Unimog U 5000.

Safety first. In any terrain. Crossing rivers, climbing sand dunes, negotiating mud and navigating steep embankments: Mercedes-Benz trucks are famous for their innovative suspension design.

Features, such as the frame with its three-point cab mounting and torsional flexibility, the special axle suspensions, all-wheel drive, high ground clearance and differential locks, ensure superb off-roading capabilities.

Vehicles prepared for deployment all over the world.

- ✓ Single fuel ability
- ✓ Efficient cooling system
- ✓ Special filter systems
- ✓ Engine starting aids, auxiliary heaters and temperature-resistant materials

AT THE END OF THE DAY ONLY ONE THING COUNTS.

You need equipment and people you can trust.

At Daimler Truck, we have harnessed our experience in volume manufacturing to establish a tailor-made production process with dedicated facilities and experts. The resulting vehicles are specifically designed and built for military challenges. The process can be leveraged for both standard and new, customised solutions.

Daimler Truck is a strong and highly flexible partner to systems manufacturers and bodybuilders. Our first-class defence vehicles are a perfect match for leading-edge bodies and systems, giving military users the best-possible answer to their imperatives.

For OEMs, we can tailor our Special Chassis and component kits to the specific needs of individual military applications – for virtually any type of vehicle, from APCs to armoured heavy recovery trucks.

Special Chassis on page 48.**

MERCEDES-BENZ TRUCK SERVICE AND INTEGRATED LOGISTICS SUPPORT (ILS).

A true partnership.

Daimler Truck is both a trusted supplier of commercial vehicles and a proven partner to modern armies – not least because we offer far more than just trucks. As a truly international company, Daimler Truck is able to provide customer-centric ILS solutions worldwide. So you can count on our support, whether you are deploying your vehicles on a mission or for standard use.

Mercedes-Benz Global Service.

- ✓ Full-spec ILS and CLS capabilities over the planned service life
- ✓ Highly skilled and experienced ILS managers and service personnel
- ✓ Mission support via field service representatives possible
- ✓ Long-term logistics support across the entire vehicle life
- ✓ Train-the-trainer programme by experienced Mercedes-Benz truck professionals
- ✓ Fleet management options according to your specific requirements

A GLOBAL PRESENCE.

Complete solutions tailored to customers' needs.

Wherever you deploy your vehicle – Daimler Truck is there to help.

Our approximately 5,000 authorised workshops in over 160 countries mean we are there for you and your Mercedes-Benz Defence Trucks. We provide the same outstanding support, expertise and technical capabilities as we did during manufacturing – via our comprehensive service network and expert service partners.

Standard service solutions.

Our extensive experience enables us to provide tailor-made service offerings. We have also developed standard service solutions designed to meet typical customer requirements. Additionally, ILS and CLS contracts can be tailored in line with specific needs. And mission support via field service representatives is possible in most cases.

Excellent spare parts availability.

Daimler Truck delivers first-class service worldwide. Our comprehensive network can support you anywhere and anytime. And the same applies to our guaranteed worldwide availability of spare parts. Wherever the operational situation is challenging, we work with you to establish a reliable supply chain.

Integrated Logistics Support.

Our ILS managers work closely with you to analyse requirements and develop a made-to-measure ILS plan. The Mercedes-Benz Truck Service package is based on your specific needs and on the desired level and type of support within any given environment. The analysis allows us to offer a full range of support options, including training and spare parts packages, plus special tools, full fleet management, and test equipment.

Your existing maintenance infrastructure is incorporated into our planning.

MERCEDES-BENZ AROCS FOR HEAVY-DUTY OPERATIONS.

Power and robustness for today's military tasks.

Engine

- Powerful and efficient 6-cylinder in-line engines with up to 460 kW (625 hp)
- Up to 3,000 Nm torque
- Strong engine brake, optional retarder
- Engine types available for low-quality fuel or kerosene
- Certified to Euro III, IV, V or VI emission standard

Gearbox

- Mercedes-Benz PowerShift 3 for automatic gear selection
- Power transmission drive programs for off-road-operation, optimised for the specific GCW
- Option: cable PowerShift for manual gear selection

Cab

- Various cabs, three lengths and four roof heights
- 100% galvanised for long-lasting corrosion protection

Off-road capability

- Heavy-duty hub reduction axles for high ground clearance and durability
- Permanent all-wheel drive for best-possible traction
- Optional part-time front-wheel drive or hydraulic auxiliary drive at the front axle
- Differential locks and inter-axle differential locks can be operated while driving

- Choice of single tyres for optimum off-road performance
- Special options for extreme climatic conditions (air intake pre-heaters, high-performance radiators, etc.)

Military options (selected)

- Fording capability
- Blackout lighting circuit
- Swivel-type roof hatch plus special centre seat/standing platform
- Lugs for air, rail and sea transport of vehicle
- Towing and recovery equipment
- Features for ADR/transport of hazardous goods; battery main switch
- Weapon brackets
- Central tyre inflation system (CTIS)
- Spare wheel holder

8x8, 8x6, 8x4, 6x6 and 6x4 axle configurations.

MERCEDES-BENZ AROCS HEAVY-DUTY TRACTOR.

Powerful tractor for high military payloads.

Engine

- Powerful and efficient 6-cylinder in-line engines, ranging from 265 kW (326 hp) to 460 kW (625 hp)
- Up to 3,000 Nm torque
- Strong engine brake, optional retarder
- Engine types available for low-quality fuel or kerosene
- Certified to Euro III, IV, V or VI emission standards

Gearbox

- Mercedes-Benz PowerShift 3 for automatic gear selection with fast gearshifts with only brief interruption of tractive power
- Power transmission drive programs for off-road-operation, optimised for the specific GCW
- Option: cable PowerShift for manual gear selection

Cab

- Various cabs, three lengths and four roof heights
- 100 % galvanised for long-lasting corrosion protection

Handling and operation

- Optimum conversion ex-works for operation as a heavy-duty hauling/transport vehicle
- Option: turbo retarder clutch (TRC) for the following advantages:
 - Up to 3,000 Nm for responsive starting/manoeuvring, no wear for a maintenance-free service life
 - Full utilisation of engine power up to the traction limit (tyre/ground)
 - Maximum braking performance of up to 720 kW
- Use of the dry clutch when driving continuously reduces fuel consumption, and allows an emergency operating mode
- Option: additional cooling system for safe operation at full power at high ambient temperatures
- Option: independent hydraulic supply for trailer
- Option: cardanic and height-adjustable semi-trailer couplings
- Option: fuel capacity of up to 1,200 l

Off-road capability/military options

- Arocs range capabilities and options are also available for heavy tractor-type vehicles

8x8, 8x6, 8x4, 6x6 and 6x4 axle configurations.

MERCEDES-BENZ AROCS FOR MEDIUM-DUTY OPERATIONS.

High mobility and agility.

Engine

- Powerful and efficient 6-cylinder in-line engines, ranging from 175 kW (238 hp) to 390 kW (530 hp)
- Up to 2,600 Nm torque
- Strong engine brake, optional retarder
- Engine types available for low-quality fuel or kerosene
- Certified to Euro III, IV, V or VI emission standards

Gearbox

- Mercedes-Benz PowerShift for automatic gear selection
- Option: cable PowerShift for manual gear selection

Cab

- Various cabs, three lengths and four roof heights
- 100% galvanised for long-lasting corrosion protection

Off-road capability

- Heavy-duty hub reduction axles for high ground clearance and durability
- Permanent all-wheel drive for best-possible traction
- Differential locks and inter-axle differential locks can be operated while driving
- Choice of single tyres for optimal off-road performance
- Special options available for extreme climatic conditions (air intake pre-heaters, high-performance radiators)
- Optional part-time front-wheel drive or hydraulic auxiliary drive at the front axle

MERCEDES-BENZ ATEGO FOR MEDIUM-DUTY OPERATIONS.

Robustness meets reliability.

Engine

- High-torque 4 and 6-cylinder engines
- Output range from 115 kW (156 hp) to 220 kW (299 hp)
- Dynamic maintenance computer for up to 120,000 km
- Designed for low maintenance and repair costs
- Engine types available for low-quality fuel or kerosene
- Certified to the Euro VI emission standard

Gearbox

- Choice of 6, 8, and 9-speed transmission for drive systems
- Manual shift
- PowerShift 3 (optional)

Cab

- Short S-cab or large L-cab, crew cab
- For up to 6 passengers plus equipment
- 100 % galvanised for long-lasting corrosion protection

Off-road capability

- Permanent all-wheel drive for best-possible traction
- Differential locks and inter-axle differential locks can be operated while driving
- Choice of single tyres for optimal off-road performance
- Special options available for extreme climatic conditions (air intake pre-heaters, high-performance radiators)

Military options

- Fording capability
- Blackout lighting circuit
- Swivel-type roof hatch plus special centre seat/standing platform

MERCEDES-BENZ ZETROS TRACTOR FOR SEMI-TRAILER.

The new Zetros.
More power. More variants.
Accept no limits.

new-zetros.com

Heavy equipment semi-trailer truck with all-wheel drive
for heavy loads and hazardous goods.

Engine and gearbox

- Reliable and strong 13-liter 6-cylinder in-line engine with up to 375 kW (510 hp) and up to 2,400 Nm torque (Euro V)
- More torque and power reserves in all scenarios
- Engine suitable for low-quality fuel or kerosene, available in Euro III and V versions
- Robust fully synchronised gearbox with 16 forward and 2 reverse gears, manual shift

Option: Fully automatic 6-range gearbox for quick gearchanges with uninterrupted traction. With or without retarder brake, at customer's choice.

Cab

- Spacious cab (medium cab as standard, walk-on roof available)
- 3-seater version (optional), optimised pass-through (no engine tunnel)
- Quick and safe boarding for crew
- Ergonomic seating position and state-of-the-art instrument panel

Handling and operation

- Low vehicle height
- Seating behind the front axle guarantees safe and excellent handling, and a smooth and comfortable ride for extended missions
- Balanced axle load distribution for safe handling regardless of load pattern

Off-road capability

- Permanent all-wheel drive with 2-speed transfer case and differential locks
- Heavy-duty planetary hub reduction axles with differential locks
- Heavy-duty vehicle frame
- Cab behind engine for smoother ride with excellent off-road capabilities
- Balanced axle load distribution for safe handling regardless of load pattern enhances crew safety without sacrificing off-road capabilities

Tough and durable

- Extremely robust chassis
- Single or twin tyres at the customer's request
- Various load ratings with up to 40 t GVW and 120 t GCW

Military options

- Fording capability up to 800 mm
- Blackout lighting circuit
- Swivel-type roof hatch plus special centre seat/standing platform
- Lugs for air, rail and sea transport of vehicle
- Towing and recovery equipment
- Features for ADR/transport of hazardous goods; battery main switch
- Weapon brackets and spare wheel holder

6x6, 6x4, 4x4 and 4x2
axle configurations.

Up to
120 t (GCW)

Up to

MERCEDES-BENZ ZETROS.

All-wheel drive for heavy loads and hazardous goods.

Engine and gearbox

- Reliable and strong 13-liter 6-cylinder in-line engine with up to 375 kW (510 hp) and up to 2,400 Nm torque (Euro V)
- More torque and power reserves in all scenarios
- Engine suitable for low-quality fuel or kerosene, available in Euro III and V versions
- Robust fully synchronised gearbox with 16 forward and 2 reverse gears, manual shift

Option: Fully automatic 6-range gearbox for quick gearchanges with uninterrupted traction. With or without retarder brake, at customer's choice.

Cab

- Spacious cab (medium cab as standard, walk-on roof available)
- 3-seater version (optional), optimised pass-through (no engine tunnel)
- Quick and safe boarding for crew
- Ergonomic seating position and state-of-the-art instrument panel

Handling and operation

- Low vehicle height
- Seating behind the front axle guarantees safe and excellent handling, and a smooth and comfortable ride for extended missions
- Balanced axle load distribution for safe handling regardless of load pattern

Off-road capability

- Permanent all-wheel drive with 2-speed transfer case and differential locks
- Heavy-duty planetary hub reduction axles with differential locks
- Heavy-duty vehicle frame
- Cab behind engine for smoother ride with excellent off-road capabilities
- Balanced axle load distribution for safe handling regardless of load pattern enhances crew safety without sacrificing off-road capabilities
- Central tyre inflation system (CTIS) for better traction on a variety of surfaces (optional)

Tough and durable

- Extremely robust chassis
- Single or twin tyres at the customer's request
- Various load ratings with up to 40 t GVW
- Variants: platform truck or tipper

Military options

- Fording capability up to 800 mm
- Blackout lighting circuit
- Swivel-type roof hatch plus special centre seat/standing platform
- Lugs for air, rail and sea transport of vehicle
- Towing and recovery equipment
- Features for ADR/transport of hazardous goods; battery main switch

375 kW
(510 hp)

MERCEDES-BENZ UNIMOg.

Built for extremes.

Engine

- Fuel-efficient engines with up to 170 kW (231 hp), 900 Nm torque
- Engines certified from Euro III to Euro VI emission standards
- Engine types available for low-quality fuel or kerosene
- Extended maintenance intervals of 1,400 hours for low maintenance costs and high vehicle availability
- Engine and/or gear box PTO's optional as a mechanical interface e.g. for driving hydraulic pumps
- High-performance engine brake reduces heating and wear of service brake

Gearbox

- Fully synchronised manual transmission with 8 forward and 6 reverse gears for highly responsive speed adjustment on and off-road
- Low range gears for speed adjustment from 1 – 90 km/h on off-road terrain
- 2-pedal electronic automated shifting (EAS) system eliminates need for manual gearshift and reduces clutch wear
- Electronic quick reverse

Cab

- Short bonnet design
- All-steel cab
- Seating for up to three people (standard cab)/seven people (crew cab)
- Ergonomic seating position behind the front axle reduces vibration stress on crew
- Roof hatch allows access to roof attachments from inside the cab

Frame/Axles

- Welded heavy-duty torsionally flexible frame
- Integrated 3-point-mountings for bodies, engine, gearbox and cab suspensions
- Portal axles with coil springs for high ground clearance
- Thrust-tube-protected and robust powertrain
- Short frame overhangs at the front and rear allow large angles of approach and departure
- 100 % grade climbing ability
- Option: fording capability of up to 1,195 mm
- Tyre pressure control system allows adjustment of tyre pressure while driving

4x4 single tyres.

**Superior
off-road
performance**

MERCEDES-BENZ UNIMOg WITH CREW CAB.

Superior off-road mobility combined with a large cab.

Engine

- Fuel efficient engines with up to 170 kW (231 bhp), 900 Nm torque (Euro VI) respectively up to 160 kW (218 bhp), 810 Nm (Euro III and V)
- Engines certified from Euro III to Euro VI emission standards
- Engine types available for low-quality fuel or kerosene
- Extended maintenance intervals of 1,400 hours for low maintenance costs and high vehicle availability
- Engine and/or gear box PTO's optional as a mechanical interface e.g. for driving hydraulic pumps
- High-performance engine brake reduces heating and wear of service brake

Gearbox

- Electropneumatic Power Shift (EPS) with 8 forward and 6 reverse gears
- Transmission with short shift times and increased endurance
- Electronic quick reverse
- Options: electronic automated shifting (EAS) and off-road working group gears

Cab

- Robust and ergonomic steel crew cabin, seating up to seven people
- Easy operation with innovative and straight-forward controls
- Front camera to further improve the field of vision

Frame/Axles

- Welded heavy-duty torsionally flexible frame
- Integrated 3-point-mountings for bodies, engine, gearbox and cab suspensions
- All-wheel drive with single tyres
- Differential locks at the front and rear axles can be engaged while driving
- 100 % climbing capability
- Option: fording capability up to 1,195 mm
- Drive shafts protected by thrust tubes

MERCEDES-BENZ UNIMOG AIRFIELD TRACTOR.

Ready for unbraked towing and challenging tasks.

Engine and gearbox

- State-of-the-art Euro VI diesel engine with 140 kW (190 hp)
- Exhaust system with spark arrestor to DIN EN 1834 -1
- Euro VI emission standard

Cab

- Excellent visibility of implements and towing rod via innovative cab design
- Heated rear window
- Camera system for outstanding visibility

Towing aircraft

- Torque converter for smooth heavy-duty towing
- Special towing mode ensures smooth starting and safe towing up to 10 km/h
- Front mounting plate (DIN EN 15432, type F1c), with height-adjustable NATO coupling
- Rear towing interface with two height-adjustable NATO couplings
- Excellent weight balance for towing and operation of implements

MERCEDES-BENZ UNIMOG. CUSTOMIZED.

Handles everything with ease –
including the toughest conditions.

Engine

- Economical engines with 130–160 kW (177–218 hp), 900 Nm torque
- OM 924 engines certified from Euro III to Euro V emission standards
- Engine types available for operation with low-quality fuel or kerosene
- Extended maintenance intervals of 1,200 hours ensure low maintenance costs and high vehicle availability
- PTO optional as a mechanical interface for operating implements (600 Nm)
- High-performance engine brake reduces heating and wear of service brake

Gearbox

- Electropneumatic Power Shifting (EPS) system: easy to operate, helping the driver to focus on the road
- Electronic Automated Shifting (EAS) 2-pedal system as an option available

Cab

- Semi-forward control cab
- Short bonneted cab
- Cab is mounted at 3 points
- Unobstructed through-cab access
- Easy emergency de-boarding
- Cabin is not certified according to ECE R29; Roll-over protection may be realized with suitable body design

Frame/Axles

- All-wheel-drive with differential locks
- Fording capability of up to 1,195 mm
- 100 % climbing capability
- Low-pressure tires
- Long-travel coil springs
- Large-volume telescopic shock absorbers
- Portal axles with thrust tubes

4x4 single tyres.

Folding roof

Folding wind-shield and inserted side windows

Excellent all-round vision, in all directions

ARMOURING.

State-of-the-art technology for maximum safety.

Evolving threats in conflict scenarios.

Defence vehicles in hostile environments are jeopardised by bombs, mines and IEDs. Logistical tasks and peacekeeping missions have to be carried out nonetheless. Vehicles that offer maximum protection to their crew, and operate reliably and with the utmost mobility in diverse climates and infrastructures are essential.

Armoured Mercedes-Benz Defence Trucks are equipped to meet these complex demands.

Resolving the “impossible triangle”.

Mercedes-Benz is able to achieve an exceptional blend of the three factors of mobility, military payload and protection – the corners of the “impossible triangle”. We rise to these challenges by collaborating hand-in-glove with the world’s top protection-system companies. Most Mercedes-Benz Defence Trucks can be equipped with special armouring to meet the requirements of today’s military missions.

Protecting your crew.

State-of-the-art armouring solutions can be fitted to most Mercedes-Benz Defence Trucks. Options range from NBC protection systems to equipment for remote-controlled weapon stations. In all scenarios, the aim is to keep your crew safe at all times.

Armoured defence trucks.

- ✓ Daimler Trucks teams up with the best protection-system companies to offer leading-edge armoured cabs and bodies
- ✓ Armoured cabs for Unimog, Zetros and Arocs
- ✓ Maximum protection against ballistic threats, mines, roadside bombs and IEDs
- ✓ Protection levels tested and certified according to STANAG 4569/AEP 55, or to specific regional, national or international standards at the customer’s request
- ✓ Compatibility with a variety of cab types and sizes
- ✓ Tailored to meet the customer’s specific needs, e.g. with customised seating configurations, 0 stowage solutions, etc.
- ✓ Optional NBC protection

OUR SPECIAL CHASSIS FOR SPECIAL NEEDS.

We combine our automotive expertise with the skills of special-vehicle partners for both civilian and non-civilian uses. This allows us to give you the chassis that matches the vehicle body you need. In addition we offer you extensive technical support to merge your body and our chassis to an outstanding mission system.

Unimog: the starting point for success.

Our extensive experience in designing, developing and building the Mercedes-Benz special-vehicle range means we have the expertise to create a top-quality chassis for military purposes. Our tried-and-tested mounting points and interfaces allow you to implement your custom body.

Our most popular chassis is a modified version of the one installed in the Mercedes-Benz Unimog: the extremely mobile and versatile 14.5 t Special Chassis, which has already been widely deployed for diverse body types. The result – after customer-specific testing – is a premium Mercedes-Benz product that includes our bodybuilder certificate.

Armoured troop carriers: striking the right balance.

It is vital that armoured patrol vehicles achieve the optimum combination of protection, mobility, and load capacity for both crew and equipment. This can be accomplished by leveraging our Mercedes-Benz Special Chassis for your custom bodies. Our standardised mounting points give you more freedom to design your body configurations with armoured sections and load compartments, in line with specific needs.

The chassis is the vital basis.

All our Special Chassis are industrially trialled and tested for special superstructures. From the engine, to the drivetrain, wheels, frame, steering, and operating console – proven components from the world's largest truck manufacturer that are tailored to your operational requirements, and that ensure your special vehicles are exceptionally robust and mobile.

Chassis certified for use with armoured superstructures.

CHASSIS FEATURES.

All Mercedes-Benz Special Chassis (Unimog, Zetros, A-Series) take advantage of our defence-range components for heavy-duty requirements. Special Chassis gross vehicle weights (GVW) range from 9.5 t to 42 t. Customised solutions up to 56 t GVW are possible.
